

THE REDCLIFF REVIEW, THURSDAY, OCT. 7, 1926.

Young People Organize A Dance Club

NEW CLUB WILL ENDEAVOR TO HOLD REGULAR DANCES DURING FALL AND WINTER—CAN MEET WITH MUCH SUCCESS IF ALL GET BEHIND CLUB AND CO-OPERATE.

Lord and Lady Byng arrived at Southampton on board the Empress of France, which was gaily decorated with hunting. The former governor-general of Canada and Lady Byng were officially welcomed by the mayor and sheriff, and then his lordship received a large group of newspaper men.

One of the first enquiries put to Lord Byng by the press representatives was with regard to his constitutional power as governor-general, which question was raised recently in connection with the political situation at Ottawa.

"I think we had better leave that alone," said Lord Byng with a laugh. "Everything turned out very satisfactorily. If the question is raised at a conference, it will be at the imperial conference, but at the present moment there is nothing one can say about it. As I say, it all worked out very well."

Asked about the recent Dominion general election, Lord Byng expressed the opinion that the result of the election was mainly due to the popularity of the Robb budget, with reduced taxation, and to three good ministers.

British Government To Help Miners

On Condition That They Go Back to
Work at Once

The government's recent offer toward a settlement of the protracted coal tieup will be withdrawn unless it is accepted without further delay. Premier Baldwin yesterday notified the Coal Miners' Federation.

The offer, which was made on Sept. 17, in a letter to A. J. Cook, general secretary of the Miners' Federation, assured the miners of government assistance in obtaining a settlement if the miners would go back to work.

As a result of yesterday's announcement, attention has been centered on today's meeting in London of the national delegate conference of the strikers. Mr. Cook last night said that the balloting in various districts of the government's offer is overwhelmingly for rejection.

The Press Association says that 7,255 men returned to the pits yesterday, making a total of 193,408 out of 1,000,000 strikers who have returned to work.

R. Chimney.

Western Farmers Should Receive Higher Prices For Wheat On The Basis Of Protein Content

The protein content of Canadian wheat averages 12.5 per cent, while wheat from other countries that there should be even more price preference for the Canadian farmer than is now obtained, but it is doubtful whether such recognition will be as long as chemical analysis is not given definite weight in the established system of wheat grading. Neither United States nor Canadian standards give a recognition to this factor, that results in increased return to the farmer producing extra fine wheat.

Protein content of the wheat constitutes an index of the gluten content in the flour. Flour with high gluten content is more nutritious, absorbs more water, and will make more loaves of bread per barrel. The standard of bread making in Canada and the United States have reached a point where buyers pay "close attention" to the chemical content of their materials, with the result that they are willing to pay premiums for better flour. When this was first raised, the price was able to pick up a lot of good quality wheat in a particular grade without paying more than the price for the particular grade. Now, however, the situation is changed. A recent statement in the United States is to the effect that "There are great variations in the protein content of wheats of a given grade. Consequently, because of the importance of this factor in millers' requirements, there is commonly a far greater range of prices for wheats of the same grade, but of different protein content, than between average prices for adjacent grades."

To a great extent the farmer has failed to profit by this new criterion of wheat value because his wheat is sold almost entirely on the basis of grades. The dry land farmer who produces under conditions of high cost both because of the high cost of the frequent loss of crops, the farmer whose wheat would receive most recognition under this new standard. Recognition of protein content as a factor in grading wheat will do much to aid many of the farmers who are now marginal producers and will raise the general level of the quality of the wheat produced, and the long run, standardization of a type which will find credit for quality, benefit both the producer and consumer.

In line with the idea concerning the importance of protein content is another suggestion pointing out the advantages of a policy of keeping low grade wheats out of the market and using those grades for food purposes. Not only do low grades have a disproportionately smaller export to the market, but they also tend to injure the reputation of the region from which they are derived. Strict maintenance of the standard line goes far to reward quality production, but because of the high quality of our wheat, further refinement of standards in terms of protein content will be particularly advantageous to Canada.

The province of Saskatchewan is particularly interested in this phase of the development of wheat production and marketing. It is a fact by the way, not sufficiently advertised—that Saskatchewan wheat has the highest protein content of any wheat produced in Canada, and the milling industries of the Dominion have been showing the particular districts in this province where the high protein wheat grows. South of the main body of the Canadian Pacific Railway and west of the Red Sea, produces the largest quantities of this extra high-grade milling wheat. The importance of this to our farmers is not yet realized. By concentrating on quality wheat production and establishing a Saskatchewan inspection system, and placing our wheat on the world's market as Saskatchewan wheat instead of the generalization of the northern numbers, it is possible that immense benefit may accrue to our grain growers, particularly when the Hudson's Bay route is opened up, ensuring our wheat reaching the markets of the world pure and unadulterated by low grade mixtures. It appears that it would be a great mistake for Saskatchewan to regard the present inspection system as final. Under it our wheat producers are suffering a loss for the benefit of the Canadian grain crop as a whole.—*Howe Van Vleet.*

Trade With Bermuda
Canada should look out and get her ships operating between British West Indies and Bermuda under the new treaty. In the opinion expressed by *Lord-General Sir John Asker*, governor of Bermuda, while in Montreal with Lady Asker. He declared Bermuda was anxious to develop her trade with the Dominion.

W. N. E. 1648

Tomato Growing in Saskatchewan

Method Adopted to Hasten Ripening of Fruit

Last year was very favorable in some parts of Saskatchewan for growing tomatoes. At the Scott Dominion experimental station 548 pounds were ripened on the vines before the first killing frost and 997 pounds were produced were picked green, a large quantity of which ripened with a few days. The method of growing adopted was to plant the seed in boxes in the hot bed about the middle of April and root about three inches apart when an inch or two high. Each four or five inches high the glass was gradually raised for a greater time each day. After all danger of frost was passed transplanting was done, the plants being placed four feet apart each way and deep enough so that only one-fourth of the plant was above the ground. The plants were started beginning in the bloom when transplanted. All the laterals were kept pruned, only the main stem being allowed to grow and this was tied to a stake so that the tomatoes were off the ground and exposed to the sun. In the superintendent's report for 1925, it can be had free from the office or from the Publications Branch, Department of Agriculture, Ottawa, an illustrated paper showing the method proposed to hasten the ripening of the fruit.

Market For Cereals

Czech-Slovakian Trade Pact Would Be Aid To Canada

Should a trade agreement be reached with the Czech-Slovakian Government, Canada would receive the benefit of a reduction amounting to about 50 per cent on her exports of cereals and wheat flour to that country, according to F. V. Kretze, commercial agent of the Czech-Slovakian Republic in Montreal. The new tariff law passed by the Pragues Government imposing duty of \$1.68 on wheat, \$1.14 on oats and \$1.50 on wheat flour per 100 lbs had been suspended until August 15. After that date the custom held that Canada would take advantage of the "most favored nation" clause in the Czech-Slovakian trade pact. Under such a treaty the duties would be lowered.

Immigration To Canada

Heavy Increase Is Shown In First Four Months of Present Year
A complete list of immigrants to Canada for the first four months of the calendar year shows an increase of 81 per cent over the same period in 1924. The actual figures are 39,462 in 1925 and 21,776 in 1924. There have been increases in every month of the year ranging from 14 per cent in January to 183 per cent in March. For the first four months in question British immigration increased from 2,519 to 12,575; from the United States from 4,572 to 5,797; and from other countries from 1,470 to 19,722.

When the economical conditions here result in bread being made out of wheat raised in the waters of his state bread is his.

The Keeping Of Eggs

"Guarantee" Eggs Found To Have a Better Flavor

A series of experiments conducted over two years has brought out several points, according to the report for 1924 of the Dominion poultry husbandman, relative to the keeping of eggs, among which are: That eggs treated by the "Guarantee" process grade much better when taken out of storage and have a better flavor than those so treated; that eggs should be stored with the small end down; that freshness has an important bearing upon their keeping qualities; that clean eggs laid before being either dirty or washed eggs; and that cleanliness of the hen and of the egg is a point that should be observed. The experiments, excepting that referring to the "Guarantee" process were repeated at Charlottetown, Brandon and Agassiz farms and stations.

Cattle Exports Decline
Cattle exports to the United Kingdom continue to decline heavily in comparison with last year. During the period ended July 15, only 913 head were exported, a reduction in comparison with the corresponding week of 1925 of several hundred head. The total shipments for 1925 up to date are 69,495, and for the corresponding period of 1924 47,239 head. At one time the exports of cattle for this year were greater than for 1925 by 15,000 head. Now the increase has dwindled down to less than 2,000 head.

R.C. Fruit Crop
As a conservative estimate Montreal's fruit crop for the present year will be worth over \$150,000 more than the crop of 1925. The cherry crop is estimated, will be 50 per cent better than last year.

Wheat From Canada Makes Name Abroad

Holland and Germany Are Now Our Chief Customers

Canadian wheat is rapidly insuring itself a permanent market in Europe, especially Holland has recently become the chief purchaser of Canadian wheat, and Germany, Italy, and the United Kingdom. The export figures for the eleven months ending February, 1926, are: Netherlands, 60,000 pounds; Germany, 45,000; United Kingdom, 217,000 pounds; United States, 10,000 pounds; Denmark, 14,000 pounds; all others, 24,000 pounds.

Ontario and Quebec have hitherto been the chief exporting areas of Canada, but the western provinces are rapidly developing up-to-date facilities. The western provinces will soon be in a position to supply their own markets, and probably at a somewhat later date the Maritime provinces also.

Mr. Blair, secretary of the Ontario and possibly British Columbia, have sufficient resources to justify the development of permanent markets abroad.

To Dominate Clover Seed Market

British Columbia To Undertake Extensive Cultivation of Clover

British Columbia sees visions of dominating the Canadian clover seed market as a result of the reclamation project in and around Sumas Lake. This body of water was recently drained by provincial authorities, leaving a valuable tract of land, which will be opened up by a system of roads and canals for sale. In the meantime the government has experimented in growing clover seed, probably of the red variety, though a recent report in the *Victoria Times* does not specify the particular kind.

A field of seed corn will be harvested this fall, the yield is expected, running around eight bushels per acre. Next season 5,000 acres of government land will be ready to harvest. The provincial minister of agriculture, Mr. D. H. Harrow, confidently expects to make a profit of \$100 per acre, and to have enough clover seed next fall to supply the whole domestic market without importing.

Registered Seed

Order Placed in Saskatchewan For About Fifteen Carloads

An inquiry for a quantity of 500 tons of registered Saskatchewan Marquis wheat has been received from a British firm by the Saskatchewan Registered Seed Association. This quantity represents 15,000 bushels, or about 15 carloads, and if filled will be the biggest consignment yet sent for registered seed wheat and other grains have been filled by the association for Argentina, United States and Canadian buyers in the last twelve months.

A Helping Hand
Irae Parent—"My teacher you to make love to my daughter, etc." Young Man—"I wish you would, boy, I'm not making such headway."

Calgary Stampede a Big Success

Upper—Ready to contest for the honors of their cities. Lower—Judging the bucking contest.

The Calgary Stampede was unique in Canada, in that it was not professional. The actual cowboys, actual chuck-wagons and work horses from the ranches in the district were the workers who made the stampede to "the real thing" in a ranching territory, where every kind of thrilling sport known in the west is participated in by genuine westerners. It is described

Landing Fields In Mid-Ocean Are Proposed By Engineer For Trans-Atlantic Air Line

Swarm Detection New and Easy Method of Locating Queen Cells

A method of doing away with the need of going through a colony and examining every comb for queen cells is described by Mr. W. B. Rixley, superintendent of the Kenilworth, N.B. Dominion experimental station, in his last report. In the two outcrops consisting of sixteen colonies, he says a shallow super is left on each colony the entire year. In the winter the spring these serve of purpose of a food-chamber and in the active season as a brood chamber. At Bridgetown additional supers given these colonies during the season were placed over the queen-excluder. Mr. Rixley states that of the fourteen over-wintered colonies only two in the two outcrops developed queen cells, all of which were along the bottom bars of the frames in the shallow supers.

By the method here described any queen cells that may be present can be detected by tipping one end of the shallow super and looking along the bottom bars of the shallow frames.

No Poison On Apples

Canadian Apples Not Affected By Spraying Methods

Following cable reports from England of ascribed poisoning from eating imported apples, Dr. Frank T. Shutt, D.S.E., Dominion chemist, produced for analysis 43 samples of Canadian apples, sprayed against the chief apple pests, and found that the apples in Nova Scotia, Quebec, Ontario and British Columbia.

Examination showed that approximately one-half the samples were entirely free from arsenic and the greatest amount found was slightly in excess of one two-hundredths grain per pound.

At this rate it would require considerable samples of average size to supply the minimum medical dose and four dozen apples to supply the maximum dose.

Green Cabbage Worms

During the late summer and autumn green cabbage worms, which are the caterpillars of the white butterfly, destroy large numbers of cabbages by nibbling the leaves and heads of the plants.

They are very common in gardens, where they can be seen depositing their eggs on the leaves of cabbages and turnips in the garden. The caterpillars, which may be used as a remedy until the plants are half formed. A good non-poisonous remedy is fresh kerosene insect powder. One part of the powder should be thoroughly mixed with four parts of water. The mixture may be applied with a duster, and by repeating the operation a few times, the worms will be killed. This, if done at the end of a short stick, the operator holding the bag over the plants and tapping it with a stick a few times in the other hand as he walks along the rows.

Poison Spray May Be Used As A Remedy

Naval men almost believe in the plan, Mr. Armstrong said. The caterpillars, which are the caterpillars of the white butterfly, destroy large numbers of cabbages by nibbling the leaves and heads of the plants. They are very common in gardens, where they can be seen depositing their eggs on the leaves of cabbages and turnips in the garden. The caterpillars, which may be used as a remedy until the plants are half formed. A good non-poisonous remedy is fresh kerosene insect powder. One part of the powder should be thoroughly mixed with four parts of water. The mixture may be applied with a duster, and by repeating the operation a few times, the worms will be killed. This, if done at the end of a short stick, the operator holding the bag over the plants and tapping it with a stick a few times in the other hand as he walks along the rows.

Plenty Of Land Available

Cheapest Land With The Highest Yield Can Be Had In Western Canada

According to cable advice the governor of the Hudson's Bay Company, speaking at the annual meeting of the company, stated that there still remained in the possession of the company 2,115,000 acres of land in the prairie provinces. He pointed out that the present price of land there was lower than that of similar land in any other part of North America despite the fact that the average tax on farm land was lower in Canada than in the United States and the average yield of spring wheat was higher. This, he said, was the great inducement Canada held out to the immigrant farmer—the cheapest land with the highest yield on the North American continent.

Backward In That Respect

A pat in China sends me an amusing yarn about Lord Wellington. Lord Bury's successor as Governor-General of Canada. His lordship, who has democratic leanings, was asked quite pointedly once in that respect," answered Lord Wellington, "but then in some places with you we are still a young race, so please don't judge us too harshly."—*London Mail.*

Harriet (see telephone)

"Oh, Charles, do come home. I've made the plug in some way. The radio is all covered with frost and the electric hot bed is sleeping. 'Moonlight and Roses.'"

is a classic community, staged on its own grounds, by a western community. There are very few such events in America or even in the world.

The Prairie Hay Crop

Important Consideration To Be Observed in the Curing Process

The years ago the prairie producers produced more than half a million acres of hay. In 1925 the hay acreage had increased to approximately two and one-half million acres. The statistics also reveal that much of this hay is grown by farmers who have no experience in curing hay or who are producing hay under semi-arid conditions for the first time. The conditions emphasize the importance of giving careful consideration to the objects sought in curing hay and the methods employed to obtain a high quality product.

Conditions on the prairie differ greatly from those found in humid sections. The abundance of clear weather, with its dry atmosphere, offers ideal conditions, but which, if precautions are not taken, may result in the quality of hay produced. In other words, the producer can employ certain methods which will improve the quality and value of the hay for the stock.

Briefly, four factors determine quality in hay: Color, odor, presence of weeds and freedom from insects. Have you noticed how the experienced hay trader determines the value of hay? The sample is drawn from the bulk quantity. The color given first consideration—it should be a bright green. It then smells in the glass. The glass should show a good hay is present. The parcel is then separated to find out if the leaves and the stems have been cured. A more minute examination determines the presence of dust and molds. Primary consideration also given to purity of the product with respect to weeds and foreign material in the hay.

With these considerations in mind, the grower must cut and cure his crop. The first consideration is to cut it at the proper time. In this respect covers all hay crops. Alfalfa should be cut in the early bud stage when the new shoots are coming from the stem. The early bud stage is best for sweet clover, but a five-inch stubble should be left. With alfalfa, the second cutting should be a fair grade. For cut hay, cut in late milk stage for cows and stage late for horses. As the crop matures more fiber is developed. Where the acreage is large, it is advisable to start cutting in late milk stage to secure the bulk at the right stage.

A most important consideration in curing hay is to retain the leaves. While the leaves (in the case of alfalfa) constitute less than half the plant by weight, over sixty per cent of the four value is contained in the leaves. The best time to cut hay is when the morning dew is off. In the afternoon it should be raised in windrows or raked off, cocked. The bunching of the hay permits a sweating process to go on which toughens the leaves so that they are resistant to decay. It also helps the fermentation process to take place, thus developing a pleasant smell to the hay. Next morning, when the dew is off, or cocks, should be opened up carefully. With clear weather, the hay will be ready to stack the second afternoon, but this will depend on the kind of crop and weather conditions. Sweet clover can be conventionally cured by cutting the crop with the binder and tying in small shocks.

Feasibility in hay is a consideration of prime importance. The crop should not be stored until the moisture content has been reduced sufficiently. The water content of new hay is about fifteen per cent. This can be determined in the case of legumes, when no water can be wrung from the stalks. Storing hay with excessive moisture will cause mold to develop, and besides, with its resultant consequences. On the prairie, if cut straw is available when it is stored, alternate layers can be stored with it. In this way the straw will absorb the flavor of the hay and make it more palatable to stock. The primary object in curing hay is to cure as closely as possible, the green crop less so than the matured crop. In reducing the moisture content, a fermentation process must go on to give a palatable product. But the leaves retained to have hay of high feeding value. Improvements have shown that perfectly cured hay is equal to fresh pasture for milk and better fat production, but that approximately one-fifth of the feeding value is lost by exposure to heavy dews. From Frost

Cotton Textile Industry. According to a recent report of the Bureau of Statistics the six largest plants in the American engaged in the cotton textile industry in which a total of \$40,200,000 is invested, approximately 20,000 persons find employment in the industry which has a production value of \$30,200,000.

Less Red Tape

"Tourist Things" Will Now Escape Being Detained at Ellis Island

Through the intervention of the British ambassador, Sir Esmé Howard, with Lord Bessborough, the present governor of Canada, the minister of immigration at Ottawa has modified the law requiring alien travelers from Europe to go to Ellis Island on arrival in New York. They will travel by train to Boston's Point, the Canadian immigration station where they will be inspected by the officials before entering the Dominion.

Third-class aliens or immigrants travelling to Canada via the United States will have to go to Ellis Island for medical examination by the American and Canadian officials, as they have been doing for several years. The Canadian Government does not desire to have all kinds of immigrants pushing through to its frontier without previous inspection, and the United States desire the examination because some of the aliens might be booked through to Canada merely as a means of getting into the United States and with no intention of settling in Canada.

The new regulation by the Canadian minister of immigration concerns the "Custard Thirde" from Great Britain, Germany, Holland, Belgium, Spain, Denmark, and Turkey.

Grazes Alone and in Combination

Alfalfa and Western Rye Grass a Good Hay Mixture

For three years a series of grazes was seeded alone and in combination with white sweet clover, yellow sweet clover and alfalfa at the Indian Head, Saskatchewan, Dominion experimental farms. In its annual report for 1925, Mr. W. H. Gibson, the superintendent, gives the results of the experiment. The latest plots were obtained when the grazes were sown alone. Full statistics are given in the report. Mr. Gibson remarks that although it is now said that a grass sown with white sweet clover is best, it must be borne in mind that the combination with alfalfa is more profitable than any other. He adds, "The use of alfalfa and western rye grass as a hay mixture is the best practice under Saskatchewan conditions."

"Have you an account here, madam?"

"Certainly. We have accounts all over town."

Of Interest To Poultrymen

The Effect of Cod Liver Oil on Eggs

To meet this suggestion sometimes made that feeding cod liver oil to laying hens increased the weight of the egg shell and improved the texture, an experiment was conducted respectively by the poultry and elementary divisions of the Dominion experimental farms last May and June. The experiment was divided into two periods, the first, or preliminary period lasting two weeks and the second, or feed-off period, a month. During the preliminary period the birds were kept on the ration they had received all winter. During the second period each bird received one teaspoonful of cod liver oil daily administered by means of a medicine dropper. While the results are not considered as altogether conclusive, Mr. P. C. Elliott, Dominion poultry husbandman, in his report for 1925, which can be had at no cost by applying to the Dominion Branch of the Department of Agriculture, Ottawa, states that the feeding of cod liver oil has no appreciable effect in increasing either the gross weight of the eggs or the weight of the shells.

Mr. Elliott adds that a noteworthy feature was the daily variation in egg weights of all the birds. In one instance with a bird that laid eleven eggs in fourteen days the difference between the maximum and minimum egg weights in that time was nearly one-third of an ounce. It was noted, however, that in all the birds the limit of variation during the half-month period was only about half that shown the preliminary period.

The King Never Gets On Race

Princess Mary Is the Only Racer

Princess Mary is really the only member of the royal family who is an out-and-out racing fan. The King primarily is a sailor. He raises thoroughbreds and is fond of horses, but racing is not popular with him. It was with his father, King Edward VII. The King never bets on races. "George," that little taste for racing, but he is much interested in breeding and in the name is true of the Duke of York.

Where Man Is Protected

Fairly Luring Man to Alfar is a Crime in France

There is still a law on the French statute book, although not enforced, that imposes a penalty on women who beguile men into marriage by means of ruse, perfume, pretences and flattery. "Whoever attracts into the bonds of marriage any male subject of His Majesty, by means of ruse or perfume, pretence, false teeth, false hair, false corsets, hooped petticoats, high heels or false hips, will be prosecuted for seduction and the marriage will be declared null and void, if the accused is convicted."

This law, passed by the parliament of 1770, is still on the French statute book. Even the introduction of the new Civil Code in 1804 left it in force, under the section dealing with "fraud in the quality of merchandise."

The Worst Cook

Says Average English Woman Is the Worst Cook in the World

The average English woman is the worst cook in the world, in the opinion of Mrs. H. Betty, leading member of the Buckingham Women's Institute.

She has an idea of the proper use of sauce and she will not use up bones and scraps," says Mrs. Betty. "I have tried to do a little better than a French woman would make a delicious and nourishing soup. She throws to the chickens the scraps which the French woman would turn into splendid stock, and gives to her children bread and dripping, where a French woman would present them with a tempting little dish made from old pieces."

The Old-Time Flapper

Puritan Flapper Used Only Snow to Bring Out Blushes

"Unlike actresses of the modern day, with their rouge, lipsticks, mascaras and what not, the Puritan flapper's complexion did not cost a penny."

Research shows that the only means allowed young girls of olden times for embellishing their complexion was in the use of an old manuscript.

"For ye complexion ye young maid may wash ye face in snow, ye thin blue cold bringings forth ye blood and imparting a rich glow of health which is ye true beauty."

The man who tells the funny story usually enjoys it most.

Strange Chinese Custom

Family Congregate to Go Homewards to the Kitchen God

The Chinese have a festival of some kind almost every month. One of the most important is the Kitchen God festival, which takes place on the twenty-third day of the twelfth month of the year. Then all the family congregates in the kitchen to do honor to the kitchen god, whose image is enshrined in the kitchen. The festival is celebrated by the members of the household during the last year.

To show that he must report only their activities, the head of the family smears the lips of the image with molasses! After this they burn the image with great ceremony and it is believed that the god ascends with the smoke.

A week later the family again assemble to welcome his return. Amid great rejoicing and the popping of many fireworks they put up a new image.—Yonah's Companion.

First Published in England

First American Short Story Magazine

Printed in England in 1840

When the first issue of the first American short story magazine in America, it seems strange to realize that the first American short story magazine was published in London.

That such is really the case. The first volume of this periodical, printed in 1840, contained 400 pages bearing some fifty tales and a number of "popular sketches." It is interesting to note that the first issue of the first American short story magazine was published in London. That such is really the case.

The publication, which was issued when the short story was in vogue as a form of writing, had a great influence on the development of that type of literature in America.

"A Little Child Shall Lead Them"

Juveniles of Japan and America Built Up Friendly Relations

Juveniles of Japan and America are contributing to international good by exchanging letters. More than 100,000 letters have been written by children of grammar schools in the countries under the encouragement of the League of Nations Association.

M. Kolawa, in charge of the boy's section of the Association in Tokyo, explains the movement, given the popularity, is "bound to contribute materially to mutual understanding and the peace of the world."

Japanese children are particularly fond of Japanese picture postcards and letter paper of pretty design. On either side the youngsters exhibit a friendly curiosity as to the life and persons with whom they correspond.

Bears Plentiful in Alaska

Brown Bear Families Appear to Be on the Increase

A party of hunters returning after a sixty-day hunt on the Alaska Peninsula, where the bears are more plentiful than usual this summer. Several big brown bears with four cubs each were killed. The hunters also killed many sheep and goats. The hunters also killed many sheep and goats.

The extra babies in the four families keep the old cubs busy feeding salmon from the creeks, which fact was noticed at every turn by the hunters. Immense bears live in the peninsula, the largest shot being eleven feet two inches in length, killed by E. L. Garrett, of Seattle.

Grain Moving From Vancouver

Heavy Shipments Are Reported This Summer From Western Port

Grain exported from Vancouver for the first half of the year has totaled 22,512,205 bushels, as compared with 22,562,205 bushels in the previous year, and 22,512,205 bushels in the year before that. An unusual feature of the export business for June was that while a total of 1,957,000 bushels was moved, not a single bushel went to the Orient, all being consigned to the United Kingdom continental market. Bookings to the end of July this year showed a total of 1,957,000 bushels for the Orient.

Valiant Sailors To Be Increased

The salaries of the entire personnel of the valiant, from the laymen down to the members of the second college, are to be considerably increased, newspapers say, in order to attract the highest class of sailing.

Winter—Walter, what kind of meat is this?

Walter—"Spring lamb, sir."

Walter—"H'm! I've been chewing on a spring lamb."

Men will all attempt anything funny—men will all attempt work.

The Slaver Of Caribou

Steps Should Be Taken To Protect Remnant Of Herd in Far North

Wagon slaughter of the Canadian caribou by the hunters of the Northwest will lead to their utter extermination within a few years, according to Harvey Magnusson, who has just returned to Manitoba after two years of prospecting and trapping in the Far North and Fort Fitzgerald country in Northern Alberta. Mr. Magnusson declares that immediate steps must be taken to protect the caribou, if the Dominion wishes to preserve this monarch of the sub-Arctic Canada.

"Only a few years ago," he said, "Caribou Island on the Slave River, near Fort Smith, where the Dumps are located, was now developing gold and silver veins, was the point at which the myriads of caribou crossed the river in the course of their wanderings. Now only a few scattered caribou are all that is left. The natives of the country have been driven in search for no reason save that of pure blood lust and desire to kill."

When the time comes when the first part of the Watkinson buffalo herd north, at present, he says, 250 head are shipped yearly to the loading point near Fitzgerald, and turned into the immense park-like tract of country which has been set aside for them. They leave the boat and travel over a four-mile trail through the woods, where the dense, mature land, studded with trees, wet meadow and simply provided with salt licks, which is now their home.

That the first winter left the original park, swam 100 mile-wide Slave and Peace Rivers and headed south, he says, is the first time the herd has been driven from its north is true, he declares. They wanted to winter further south, but in the winter of 1924-25 the herd was driven north to fresh feeding lands. The park has been extended southward, he said, to permit this migration.

Wood buffaloes are already more plentiful in the park than they used to be, Mr. Magnusson said, and piglets and calves are being born. There is little difference between the two herds, he says. The wood buffalo is a little larger and darker, and already successful crossing of the two species has taken place.

Cue Of The Blue Mattress

Life Savings Handed to Jack Man

Mr. and Mrs. Peter Adams, of Springfield, Mass., whose hopes of retirement were shattered by the death of their son, have been able to live in comparative ease with savings of \$1,200 were dashed when Mrs. Adams sold the blue mattress containing the family savings to a junk man for 25 cents, as again happy, for their fortune has been restored.

With their straitened purse paid for and most of their effects shipped, the Adams family went to the bank and withdrew the \$1,200, his savings from his wages in a local factory over a term of years. The money was in a chest. He neglected to mention the fact to his wife. When she called on the junk man's call she also discovered a collection of odds and ends, including the bag that held the \$1,200.

That the money was recovered is due largely to the fact that Mrs. Adams sold an old blue mattress in the junk man's store. When Adams remembered and discovered what his wife had unwittingly done the police were notified.

That the junk man was middle aged and had children. But she also remembered the blue mattress. Three years when a general call was sent out to policemen to look up the search, it was not to find a junk man with the blue mattress.

Two detectives following this clue located a junk dealer who listed the exact business for the blue mattress and the shoe was found and the missing cash was discovered last night.

WORLD HAPPENINGS BRIEFLY TOLD

The men in Reading, England, whose radio loud speaker was heard by his neighbor will be liable to a fine of £25.00.

Captain Pevsner, a Russian of Ceter, failed trial by a special court martial because he slapped William R. Colburn, American minister to Rumania.

Ramsel Scott, a pioneer of the west who for many years was associated with the agricultural interests of the country and was a prominent member of the Winnipeg Grain Exchange, is dead.

Railwaymen of Vancouver will vote some time next October on the \$100,000 bonus for carrying out the proposed civic centre scheme. The greater part of the money will be required for expropriation of private property.

Two noted Canadians who had been already appointed jury commissioners have been sworn in at the jury court held by His Majesty the King, Mr. Hon. Francis Anglin, chief justice of Canada and Mr. Hon. George Perry-Graham.

Elck Quiltingman, reported to be 164 years of age, and the oldest Indian in British Columbia, died suddenly at his home on the Englishman's river. Robert Alexander Baker, well-known advertising man and president of the Baker Advertising Agency, Toronto, is dead.

Twenty-six persons are dead and four are blind from poison illness in Buffalo and nearby New York and Eastern Canadian cities. Thirteen of the dead are from Buffalo. Three more died at Lockport. The other thirteen died in cities on the Ontario peninsula.

An increase of \$11,131,459.49 or 25.59 per cent. in the net earnings for the first six months of 1928 as compared with the same period of last year is shown in the financial statement of the Canadian National Railways for the period January 1 to June 30, 1928.

Recent dismissal of colored waiters from the Canadian National Railways during our service in the United States has caused a protest at a meeting held in Toronto under the joint auspices of the United Negro Improvement Association and the Canadian League for the Advancement of Colored People.

60,000 Harvesters Wanted

Army of Harvesters Required to Gather the Crop of Prairie

It is estimated that about 60,000 extra men will be required to gather the harvest in Western Canada this summer. This army of harvesters will be drawn from the provinces of Eastern Canada, British Columbia and the United States. The estimate that Saskatchewan will need 25,000 men; Manitoba, between 8,000 and 9,000 and Alberta, about 7,000.

From points both east and west beyond the three prairie provinces of Manitoba, Saskatchewan and Alberta, specially low railway rates will be available to certain central points in Western Canada for those going to work in the harvest. Reduced rate tickets will be issued at reduced rates to harvest hands providing they have resided at least a month on farms in Western Canada.

Was Original Peter Pan

The Boy Who Never Grew Up Now Best Man at Wedding

"Peter Pan," the boy who never grew up, played quite a grown-up part in the world recently.

Peter Llewellyn Davis, the original of Jim James Barrie's Peter, acted as best man at his brother's wedding to Rose, England. Jim James also attended the ceremony.

"Peter Pan" the boy by Nicholas Cleverly Davis. He was married to the Honorable Mary Anne, daughter of Lady Northbourne. He is one of Sir James' sons.

The big Medicine Hat plant of the Canadian Western Seed Corporation, which has been idle for some years has been purchased by the United States Horsehoe Manufacturing Company, of Erie, Pennsylvania. The latter is also negotiating for the purchase of Red-Hill Rolling Mills, the equipment of which would be used to produce the medicine hat to emerge the plant for iron-rolling process.

Many Hospital Beds

A hospital census in Canada reveals the fact that there are 25,618 hospital beds in the Dominion. Of this total 1,913 beds are available for maternity patients. The census also shows that there were 24,434 births in hospitals in Canada in 1927.

The man who poses as a lion in society is usually a bear in his home.

Gandhi Would Reform India

Tells What Measures He Would Take If He Were Emperor

"If I were Emperor of India," Mahatma Gandhi, the great Indian Nationalist leader, states, "I would prohibit the importation of foreign liquor and close down every distillery; I would command the representatives of both Hindu and Moslem, search their pockets and deprive them of all articles and weapons, and then lock them together in one room and open it only after they had settled their quarrels."

He would take the land of fellowship to the whole world, irrespective of caste, color or creed; I would demand the entire army of occupation in India, retaining only enough police to protect the citizens; I would guarantee full protection to every European as well as all honest European enterprises; I would guarantee protection to all forms of religious worship, except that which is repugnant to the moral sense of mankind; I would not break the frontier barriers which are now being built, but would cultivate their friendship, and I would impose a prohibitive tariff on all foreign cloth."

Hearts Of Oak

British People Never Shook Higher In Respect and Confidence of the World

The British as a political people never rose higher in the respect and confidence of the world. If they were not steady as a rock through the storm and stress of various crises, they would be home and foreign imperial affairs, there would be no hope of stability in Europe, and the world would be in the hands of a panderous war, and if we tell the whole wide structure of the old world would crash. In the midst of the Armistice we are still holding firm, despite anxieties, disappointments, crises, and even coming out of it, but, after beating us from all quarters together in a way that might have won the heart and then the hand sold—J. D. G. Davis, in London Observer.

Manitoba Dairy Industry

Growth in Recent Years Has Been Pleasant

The growth of the dairy industry in Manitoba was recently summed up by J. A. Gibson, dairy commissioner for the province. In 1912, according to the statement, between 20 and 30 carloads of butter were shipped into Manitoba from Ontario and Quebec. In 1912 imports were 25 carloads and in 1914, 29 carloads. In 1915, Manitoba produced enough butter to meet market requirements and also shipped out of the province 56 carloads. This has been increasing every year since 1912. The province has produced 325 carloads valued at \$2,100,000.

Activity in Building

Encouraging State of Conditions in Canada Generally

Building was more active in Winnipeg than in any other city in the west. The first six months of this year the total value of the building permits was \$4,000,000 compared with a total of \$3,219,000 for the similar period in 1927.

This activity in building in Winnipeg is in many other places throughout Canada is indicative of the encouraging state of conditions generally in the Dominion. With the prospects for another good grain harvest this year, farmers and business men in Canada are feeling optimistic.

Women Enter Legal Profession Six more women have been called to the bar in London, indicating that an increasing number of them are taking up the legal profession as a means of livelihood. Among the latest to do the wig and gown of the English bar are the Hon. Miss Buckley, daughter of Lord Weymouth, a bar of the appeal; and Miss Beng Hong Lim, of Penang, Straits Settlements. Miss Beng is the second Oriental woman to be called to the bar. Her brother, Kiat Beng Lim, also has been admitted to the profession.

British Use Dollar Sign

Dollar signs on goods have appeared for the first time in the shopping districts of London requested by American tourists. The marks, quite evidently are London made, as they are very much of the perpendicular variety, and lack the original Yankee twist.

Carcass heads are killed when they are only a few days old, before the cost of their fat increases. In order to produce Poshan lamb and Astorian furs.

Pullman porters measure time the same way that amateur anglers do—down to the second.

IDEAL Fashions Jas. J. Smith

Fashion tells us that sport frock has become the land of fellowship to the whole world, irrespective of caste, color or creed; I would demand the entire army of occupation in India, retaining only enough police to protect the citizens; I would guarantee full protection to every European as well as all honest European enterprises; I would guarantee protection to all forms of religious worship, except that which is repugnant to the moral sense of mankind; I would not break the frontier barriers which are now being built, but would cultivate their friendship, and I would impose a prohibitive tariff on all foreign cloth."

Survey Of Unoccupied Land

Manitoba Government Taking Agricultural Survey of the Province

The Manitoba Government has commenced an agricultural survey of unoccupied lands in the province which when completed will provide the farming settlers with all available information on such lands. A total of 2,174 homesteads have been taken up in Western Canada this year. In addition 61 families consisting of 1,133 persons have come to the province under the government settlement scheme. The Canada Land Survey Association has shown 613 families on 150,555 acres of land in the past year. All post-war immigration records were broken recently when 1,841 immigrants passed through Winnipeg in forty-eight hours.

To Manufacture Automobiles

Engineering Firms in Australia Endeavor to Establish Industry

Four large engineering and electrical equipment manufacturing firms in New South Wales are planning to form a company capitalized at £1,000,000, to produce Australian-made motor cars. They intend to build a six-cylinder type car suited for Australian conditions, and apply to the manufacturer the mass production system. Representatives of the four firms are in agreement with the Australian Government with the suggestion of a subsidy to aid the new industry. The minister of trade and customs promised that any reasonable recommendations would be sympathetically considered by the cabinet. Australia is the largest importer of U. S. automobiles.

CHAPTER X.—(Continued)

Joanna laughed gayly with him. "Funny things to look forward to, however, weddings, aren't they?" he laughed, looking down at her quietly.

"Funny you say, getting through the marriage stages fast enough to leave time for an anniversary like this?"

"Oh, I shan't be so quick to get married that I'll be likely to change my mind," Joanna returned.

"That's a sensible remark," Kenneth agreed. She felt his arm tightening a bit. He was holding her closer than Brandon had, almost as close as her own dancing boots comfortably did. She began to wonder what his thoughts were.

"With her and talked to her on the level of any youth. She had observed earlier in the evening that most of the men around the tables appeared to be men who had their women."

She reflected, they seemed to be men who had a place in life and, so were more worthwhile than inconsequential young men. And she rather liked the thought. Her companion was still talking to her as he swung her delicately in and out among the dancers on the ball crowded floor.

"An exquisite flower like you, and your happy kind—much more attractive when you're not set on being exclusively one in one coat, I should say, half the things I really mean if I thought you'd be adding them up into a matrimonial aim. You'll find life is all too short for that sort of thing."

Joanna looked at him gently. "I don't want to say anything to you," she answered. "But I'm not sure just what." "I'll probably come to me in

the middle of the night and then I'll know I'm a dumber!"

"I shan't worry your comments now, and spare your slumbers," he returned. "I don't like that dumber!" You should be at our feet, sir, and speak freely of pleasant things. He shall enter our ear and depart not from the center."

"Your deliveries will have to be better than your samples, or they won't ever get into the first set," she promised. "I thought we had decided to talk about Yvonne, and the husband. Why did she divorce him, if she had to marry him at all? I've always wondered about such things."

"Our beautiful friend is one who is never comfortable without a thrill," Kenneth informed her. "A new husband is a thrill, I suppose."

For other reasons for Yvonne's whims, you'll probably find them out for yourself. She has taken a liking to you. I know the signs. She'll probably decide to like you under her skin. You will make an admirable foil for her."

"A serious turmoil, then, through Joanna's mind. "Some Captain might take her, Joanna under her wing! The most glittering when in the world according to her standard. She glanced shyly at the man who was dancing with her. He caught her glance and smiled.

"Quite probable, I assure you," he teased. "And the obligation went on your side, you know. You mustn't forget it."

"She's collected half a dozen of at least two millionaire fortunes already," he said. "I don't see what you mean."

"Mr. Brandon? I don't see what you mean? You've got me giggling! Oh, well, we've all our friends. You'll play us one against the other, most likely. So I'll start your imagination working. If there is one thing in the world that your charming Yvonne desires, that she hasn't found a way to get, to Brandon, your husband's approval. And Brandon undoubtedly will be having a try at you. Because any other woman would handle the situation differently. I've a mind Yvonne will want to take her newest rival right into her own camp."

"The whole thing, almost whimsical, but Joanna was certain he was serious. And she remembered her impression that the coming of Yvonne and Kenneth to Brandon's table had been prearranged. It made another puzzle that baffled her. She tried to catch Kenneth's eye in vain.

"Why are you telling me this? She flung up at him.

He didn't answer her at once, but smiled, smilingly again, and let his eyes roam over her upturned face. The music stopped, and he guided her in the throng of the dance floor, toward an opening between the tables. She did not acknowledge her sudden guidance.

"You have told me, you know," she reminded him. "I shan't forget it. I shan't so that he could not evade her again. Why you warn me against your—half of your friends? I don't know. I've a mind Yvonne will want to take her newest rival right into her own camp."

"You have told me, you know," she reminded him. "I shan't forget it. I shan't so that he could not evade her again. Why you warn me against your—half of your friends? I don't know. I've a mind Yvonne will want to take her newest rival right into her own camp."

"You have told me, you know," she reminded him. "I shan't forget it. I shan't so that he could not evade her again. Why you warn me against your—half of your friends? I don't know. I've a mind Yvonne will want to take her newest rival right into her own camp."

still. And just how you are the stake. I'm going to play for you, too."

CHAPTER XI.

Joanna is Invited To Yvonne's

The flush that depended the hint of Joanna's cheeks, and the wrinkle in her brow, did not escape Yvonne when Kenneth and the girl returned to the table. Brandon, too, saw, and divided a quick glance between the girl and the man who had been dancing with her. "Yvonne, in her fluttering way looked at his hand."

"It's been making love to you! I know it. Was I right? I don't like to be with your eyes."

Joanna's brow vanished. In the sheer joy of her comment to the women whose entire being and fascinating appearance is a world of hectic romance had been a celebrity, her trouble over the mystery which confronted her in her new association was quickly chased away.

"Am I supposed to tell?" she started, surprised to Kenneth, who was not unambiguously lighting a pale topped cigar. "The answer certainly is, my dear, my dear, you tell your lips the words on your breast, for your friends to estimate and your rivals to envy." "You say as well be sure, I make my confession. I promised to overtake you with my adorations. But you must assume the responsibility that I did not begin by saying you compliments."

"I have heard," Brandon remarked, "that Brandon never compliments a woman. A dozen of his victims have assured me that he delivers his love first and then tells her of it. His reasons are, therefore, accepted as being truthful statements of fact, not flattery. A woman doesn't care to be told of her love by a man who is in love with her, as flattery. She believes it to be a just inventory of her attractions."

"Clever, that!" Yvonne declared. "I prove what I've always contended—the man ought to have a style of his own. It's positively tiresome to listen to most men go sentimental."

"What every hour you must speak," Kenneth continued. "I promise you complete relaxation if you will take a turn on the floor with me. Margaret, here, is dying to ask Brandon what sort of a chap I am, and to ask him who you're planning to marry."

"A cocktail, dear," she demanded. A waiter, to whom Kenneth had been entrusted a pair of silver snails, responded to the signal. Joanna had refused a previous offer and had not been present. This time Brandon quickly reached across the table and turned up her glass.

"When Yvonne, as she had to her, had moved away for her dance with Kenneth, Joanna turned to Brandon eagerly.

"He seemed to me, just what I was thinking," she said. "Tell me about him—and Yvonne, too. I never dreamed that some day I would know her. You see she is a pretty girl, very interesting people we talk about just to prove that we keep up with the times."

(To be continued)

Edison Dislikes Painted Portraits

Billion Pictures Not Good Unless Mechanism is Used

Thomas A. Edison's love of machinery is displayed even in his attitude toward pictures of himself. Sir John Lavery, the English portrait painter, who spent several weeks in the United States painting Pittsburgh millionaires and other persons, has told of how he tried to persuade the famous inventor to pose for a portrait.

"The artist had painted one of Mrs. Edison," John told Mr. Edison, pointing, asserting he was opposed to painted portraits because they were made without the aid of mechanism and therefore could not be "really very good."

"Everything in this world should be done by machinery and measured," Sir John quoted the electrical wizard as saying.

The Death Of Wolfe

Discussion Has Arisen Over Authenticity of Portrait at Oxford Museum

Canada reader will be interested in the original and the portrait of a military officer has been telling me, that the picture of the death of Wolfe, painted by Edward Poynter in the Ashmolean Museum of Oxford, is a false work, whereas a copy of it in the Royal United States Service Institution is authentic.

Polish Engineering Project

Hopes to Unite Black and Baltic Seas Through the Riverse of Poland

A special League of Nations committee, on which there are several engineers, including an American, Mr. Lanza, is to investigate the possibility of uniting the Black and Baltic seas through the river of Poland.

The Poles are hopeful that Great Britain will finance such a project, which will necessitate the construction of several canals, so that Polish coal may be shipped southward and no longer compete with England for the southern markets.

Polish coal has been making heavy inroads in these centres, in view of the British coal strike.

Brings Substantial Income

Missouri Woman Makes Good Living Selling Butterflies

Income from the sale of moths and butterflies has helped Mrs. Edith H. Macomber, of Burlington, Missouri, to educate her three daughters and to take a year's vacation in California.

Macomber, with the finding of a common pillar in the garden by her daughter, which gave her the idea. She has since then thousands of moths, butterflies and cecropia to teachers and naturalists.

University Of Saskatchewan

1977 Students Enrolled At University During Past Year

The total enrollment at the University of Saskatchewan in the past year was 1,977, an increase of over 20 per cent, as compared with the previous year, while the extension department reached over 20,000 persons, an increase of over 40 per cent. This year approximately 110 degrees will be conferred and 20 certificates granted to those who have completed courses in agriculture and pharmacy.

These figures are based on statistics for the year ended June 30, 1925, and are the highest in the history of the university's history.

Minard's Liniment for Dandruff

Largest Skyscraper

The largest skyscraper in the world to be erected in Rome as a monument to the Empire, is the project of an Italian architect. He was recently given a private audience with the pope, who was especially interested in the plan to place a church at the top of the great building, 600 feet above the street.

Contemplate Commercial Career

Ranking George of Greece May Enter Trade

Ranking George of Greece, who with his wife is now visiting London, is said to be contemplating a commercial career.

When he was forced to abdicate a few years ago by the Greek revolution he was promised an annuity which has not been forthcoming.

The ex-king is a daughter of the Queen of Rumania. The ex-king was educated in England.

A meeting of the school board will be held in the school tonight.

Mrs. and Mrs. O. Perry and family, of the Brevett district, have moved to Iowa for the winter.

Peter R. Armstrong an old-timer of the Medicine Hat district died last week.

Mrs. and Mrs. Wilfrid Campbell have moved into their new home on Seventh St., and are now comfortably settled.

P. Campbell is having some extensive repairs made to his new house on Sixth St. He expects to have it ready to move into next week.

Good progress has been made with the drilling at the oil well here during the past week. At present the drill is down about 1000 feet.

At the Press convention held in Victoria last week, E. L. Stone of the Redcliff Review was elected President of the Alberta Press Association.

During the past week R. Moore purchased the residence on Third St. previously owned by Geo. Dunnett. The family has now moved into their new quarters.

Home from his holiday the editor returned last Monday safe and sound. He is now on the job again anxiously waiting for your advertising, job work and subscriptions.

Members of the local Legion are holding a billiard tournament in the club room. Considerable interest is being taken in it and the games are progressing as scheduled.

On page four of this issue R. E. Gust has a full page adv. which is well worth looking over.

Elections for the cabinet in the new King government will be held on November 8th. It is expected that none of the ministers will be opposed and that all will be elected by acclamation.

Farmers of the surrounding districts are busy these days putting in their seed's supply of coal. They are getting it in by the car load from Alex. Smith, as the local mine is not operating at present.

Next Tuesday, Oct. 12th, a whist drive and social will be held in St. Andrew's Parish hall commencing at 8 o'clock. An enjoyable evening is assured to which you will be welcome.

Antonio Demiduk met with an accident while engaged at his work on the C.P.R. last week. The wound now appears to be more serious than was first thought. It is feared blood poisoning has set in.

The J. W. A. will hold a jubilee sale in the Parish hall on Saturday, Oct. 16th, commencing at 2:30 p.m. Tea will be provided. Friends who have castoff clothing or other "junk" to spare will oblige by offering Mrs. Cooper; the articles will then be called for.

Dr. R. L. Stiner and Mrs. Stiner moved to town from Irma yesterday. They arrived here last evening. Dr. Stiner is one of the pioneers of Redcliff; he has long studied the town and is largely responsible for the several industries already located here. Dr. and Mrs. Stiner are here on a combined business and pleasure trip.

John Reid who has been in the Vancouver district for the past month, returned home last week-end.

We wish to thank Mrs. Lakely for the excellent sample of apples grown in her garden this year. The fruit has an excellent flavor and is exceptionally large.

The local Masonic lodge will hold a social evening in the lodge room on Tuesday, Oct. 19th. Quarry lodge members are requested to get in communication with the secretary before the 15th inst.

The following is the standing of the language classes being taught by Mrs. Matheson: French, class A, Ruth Stronach, 92; Margaret Bellhorn, 89; Alex. Stronach, 85; French, class B, Dave Broadfoot, 79; Frances Buckley, 74; Bernard Thacker, 65; Hugh Matheson, 55; Nona Rose, 54; Billy Bellhorn, 51; Latin, class A, Margaret Bellhorn, 95; Ruth Stronach, 90; Alex. Stronach, 82; Class B, Frances Buckley, 76; Billy Bellhorn, 69; Hugh Matheson, 67; Nona Rose, 64.

Specialization

Is not a new word—but it fits our case

WHICH IS THE BEST?

To do ten things well—but with only fair success—or to specialize and make a real success of it.

The present demand for The Hicks Trading Co. Suits and Overcoats shows the approval of men to get greater value for less money.

Suits and Overcoats

Stomach So Bad Can't Even Eat Fruit

"For years was badly constipated and troubled with gas and indigestion. Could not eat fruit and many other things. Adierka has done me good—can now eat anything." (Advised) W. H. Fletcher, Adierka removes GAS and often brings astonishing relief to the stomach. Brings out a surprising amount of old waste matter you never thought was in the system. Cleanses the bowels and makes you enjoy eating, without for chronic constipation. Try a Post Office Drug Store. —L.S.

New Telephone Rates are Necessary

BECAUSE

The old rates failed to provide any reserve provision for depreciation or storm damage on an investment by the people of the Province of \$22,563,483.77.

1 The old rates barely paid for operating expenses and interest charges on the capital debt.

2 The interest charges of over a million and a quarter annually are fixed and must be paid.

3 Operating expenses have risen up to \$10.00 per station in the last few years and can be cut no further without seriously impairing the service.

4 The old rates barely paid for operating expenses and interest charges on the capital debt.

5 The individual subscriber's share of the increase is small and he receives dollar for dollar of real in good telephone service.

6 With adequate and fair rates, Alberta's Telephone System is second to none in America. As a subscriber you appreciate this.
